

# BLOCK & INDEX

## BLEND STRATEGIES FOR GREATER CONTROL

Our block and index products give you the power to blend the benefits of fixed and index rates—giving you greater control over your energy budget. These products offer flexibility to secure fixed prices for specific portions of your load while letting the rest follow the market index. For companies with predictable business cycles, this is a great way to protect your most critical load blocks from volatility, while avoiding excessive risk premiums or over-commitments during periods when your usage is less critical.

### BEST SUITED FOR COMPANIES THAT:

- Want to secure some of the load but pursue market opportunity
- Run on predictable business cycles
- Can curtail electricity use outside of secured blocks
- Have some understanding of power market movements
- Can tolerate limited price fluctuations

### PRICE FLUCTUATION

LOW  HIGH

### RISK TOLERANCE

LOW  HIGH

### INVOLVEMENT LEVEL

LOW  HIGH

### BLOCK & INDEX RATE PRODUCT SUMMARY

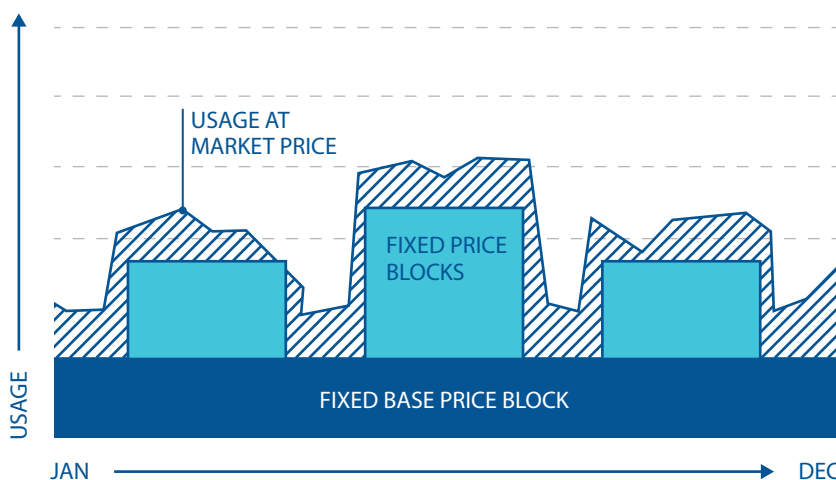

**Secure pre-determined portions of your load**

**Float the remainder on market index prices**

**Flexibility to adjust strategy as market changes**

**Limited risk premiums**
